

VALTRON®

FORMULATED DETERGENTS

VALTRON® aqueous detergents are formulated with high-purity raw materials for precision cleaning applications in high-tech industries such as the electronics, precision optical, ophthalmic, medical device and instrumentation, photovoltaic, computer hard disk drive (HDD) and LED manufacturing. VALTRON® formulated detergents are supplied in liquid concentrate for dilution with deionized water and are effective for use in ultrasonic, megasonic, pressure spray, and mechanical scrubbing applications. The liquid concentrate detergent formulations range in pH from 2.0 to 14.0 and are processed through 0.2 micron filtration to ensure product purity. VALTRON® detergents exhibit excellent cleaning characteristics and leave no organic or inorganic residue after rinsing.

UNIQUE FEATURES

- 0.2 Micron Filtration
- Effective Contamination Removal
- Excellent Rinsability
- Biodegradable
- Customized Formulations
- ISO 9001 : 2008 Certified
- Continuous New Product Developments

APPLICATIONS

VALTRON® formulated detergents are used in various industries, including Solar Wafering, Semiconductor Wafering, LED, HDD, Ophthalmic Lens, Precision Optics, Precision Metalworking, Medical Device, Ceramics and Fiber Optics

PACKAGING

VALTRON® formulated detergents are available in 5 gallon pails and 55 gallon drums.
